

SUNSHINE GUIDE TO OAHU'S KANEOHE BAY RESORT AREA, HAWAII

LOCATION: Kaneohe Bay is located on the north shore of the island of Oahu, almost directly north of Honolulu, and connected to it by the Likelike Highway. The area is situated on the windward (*koolau*) coast of the island, with its attendant heavier sea breezes and stronger surf. The beaches are extremely treacherous during the winter months, but are considered safe during the summer. Always check locally before going in the water.

COMMENTS: Bright sunshine is likely on 54% of the daylight hours of the year. This might range from a low of 56% in cloudy December, to a high of 61% in August and September. The lowest temperature of the year should be close to 59° on some calm and clear winter sunrise, and the highest should be near 90° on some sunny and windless summer afternoon. Sensible afternoon temperatures (the ones you feel) will be up to 4° warmer than actual ones during the warmer summer months, due to the relatively high humidity. Hawaiian residents see the year as having essentially two seasons. The *kau* season corresponds with the high-sun period; and is the sunnier, drier, and slight warmer of the two. It extends from May through September. The *hoo-ilo* runs from October through April, and corresponds roughly with the low-sun period. It is essentially the rainy season.
