

SUNSHINE GUIDE TO THE BERMUDA ISLANDS, NORTH ATLANTIC OCEAN

LOCATION: The Bermuda Islands are located in the North Atlantic ocean some 500 miles to the east-southeast of Cape Hatteras, North Carolina. There are about 150 islands in the group, some quite small. The total land area is a little over twenty square miles, and elevations are everywhere close to sea level. Bermuda is a self-governing British Colony, with very close ties to the United Kingdom.

COMMENTS: Bright sunshine is likely on 54% of the year's daylight hours. This might range from a low of 47% in February, to a high of 63% in July and August. The year's lowest temperature should be close to 46°, and the highest should be near 91°. Sensible afternoon temperatures (the ones you actually feel) will be essentially the same as actual ones from October through June, and 3° to 5° warmer during the other three months. The high-sun season runs from April through September. Afternoons are fairly sunny, hot, humid, and moderately wet. The low-sun season runs from October through March. Afternoons are somewhat less sunny, mild to warm, moderately humid, and a bit less wet. Weather conditions do not vary much from one month to another. Rainfall is abundant in all months.
